

# Solar Energy Exhibit

## Activity Grade Level Recommendations

This section outlines suggested activities for you to do with your students before and after your field trip, using simple low-cost materials. They are intended to deepen and extend the educational experience, but they are not required for the field trip.

In the table below:

-  This activity is suggested for this grade level.
-  This activity includes modifications to adapt it for this grade level.
-  This activity is not recommended for this grade level.

The pre-visit activities help students prepare for their field trip, and the post-visit activity provides a chance to review what they did and learned on the field trip. The other activities are equally effective before or after your visit.

	PreK	Grades K-2	Grades 3-5
Space Media Hunt (pre-visit)			
Suncatchers			
Shadow Tracing			
Investigating Starch			
Hot Air			
Potato Maze			
Reflections and More Questions (post-visit)
